

## NANO flex

When **Nano**flex technology was born it opened the window to the beautiful world of natural guitar sound reproduction.

**Nano**flex pickups not only take the vibrations of the strings like common undersaddle pickups. **Nano**flex senses the vibrations of the strings AND the body of the instrument simultaneously. This gives the equivalent of having a condenser-microphone mixed with an undersaddle pickup. No other technology gives you this high level of sound reproduction.

## NANO MAG

Shadow's patented **Nano**MAG pickup technology is an absolutely new approach in acoustic guitar amplification. It is the only pickup of this kind on the market which provides an acoustic sound, but can also produce a sweet blues or jazz sound.

It is very resistant to feedback and has incredible dynamics. **Nano**MAG is a breakthrough in magnetic pickup technology that outperforms all the rest.

## PERFORMER PRO SERIES

### Preamps for Acoustic Instruments

professional pickups since 1971

## Shadow's Performer PRO Series

Congratulations and thank you for choosing a Shadow pickup system. Shadow's pickup systems have been designed by a team of musicians and technicians to provide performance, comfort and accommodate your playing style. Since 1971 musicians from all around the world have been relying on Shadow pickups.

This makes Shadow to the **No. 1 pickup manufacturer worldwide.**

### Performer PRO Doubleplay

- Volume: Controls overall output signal.
- Phase: Inverts signal and cancels overall feedback.
- Bass/Treble can be set for each pickup separately.
- Bass: +/-10dB@35Hz (NMG) +/-10dB@30Hz (NFX)
- Treble: +/-12dB@20kHz (NMG) +/-10dB@13kHz (NFX)
- M/S: Mono-Stereo-switch.
- **Nanoflex/NanoMAG Slider:** The heart of the Doubleplay! It mixes the **Nanoflex** pickup with the **NanoMAG** for an incredible range of different sounds for your individual playing style.
- **Battery Low LED:** Turns on when battery power is low. Replace battery within 30 minutes.
- **Auto-Start:** Battery turns on, as soon as you plug the instrument cable into the endpin jack.

## Technical Data

SH Performer	Current	Battery Life
PRO Doubleplay	1,80 mA	115 hours
PRO Tuner	0,27 mA	770 hours
<i>All Models</i>	Output-Impedance: 660 Ohm Battery: 2 x 6V (CR2032 Lithium Cell)	

### Performer PRO Tuner

- Volume: Controls overall output signal.
- Phase: Inverts signal and cancels overall feedback.
- Bass: +/-10dB@53Hz
- Low-Mid: +/-10dB@2kHz
- Hi-Mid: +/-7,5dB@3,5kHz
- Treble: +/-10dB@10kHz
- **Tuner:** Activates tuner and mutes overall output signal.
- **Battery Low LED:** Turns on when battery power is low. Replace battery within 30 minutes.
- **Auto-Start:** Battery turns on, as soon as you plug the instrument cable into the endpin jack.
